DERMATOLOGY NEWS

MicroSilver BG, a natural alternative to antibiotics, new product available only through West Coast Veterinary Clinic, as a cleansing shampoo, nurturing spray and soothing cream.

WHAT IS MICROSILVER BG?

It's a 99.97% pure silver which has undergone a patented production process increasing surface area by 100x leading to maximum silver ion release.

MicroSilver BG has a broad spectrum antimicrobial efficacy including multi-resistant bacteria. Antimicrobial activity is achieved through controlled silver ion release.

MicorSilver is nonabsorbable and therefore remains on the surface to fight off bacteria for numerous hours.

Totally safe.
